

What is Go4

Go4 is the best of CBI bunker technology and know-how, Shenfei quality shipbuilding and the Maersk Broker worldwide network in a single product.

Why Go4

Go4 delivers intelligent bunker solutions that ensures your customer's satisfaction and gives you a rapid return on investment.

The Go4 Difference

Go4 uses a modular approach to build state-of-the-art bunker tankers based on internationally approved, industry standards. Go4 builds it right the first time to meet specific bunkering needs.

With CBI Technology, a leader in bunker technology and a proven track record of innovative solutions, combined with the high quality ships built on the ISO-certified Shenfei ship yard, Go4 is becoming the trusted brand of bunker barges. The Go4 brand will mean the delivery of a quality product with exact volumetric measurement, which will have your customers coming back to you rather than your competitors.

Go4 gives you one bunker barge that is capable of producing all Marine fuel types. With its unique tank segregation system, you can deliver multiple fuels to multiple clients before returning to the terminal once you are empty. This offers high flexibility, low cost and an excellent return on your investment.

Go4 offer contractual ownership from signature to virgin voyage.

Go4 uses only high quality suppliers with verified references and ensures spare parts are available

Go4 History

Go4 knows bunkering. For 10 years CBI Engineering has worked to shorten the supply chain from refinery to ship manifold by setting new standards and creating new innovations in the global bunker industry. With a decade of hands-on knowledge and experience helping build better bunkers, the Go4 vision became reality with the combination of the new MARPOL legislation, a partnership with Shenfei Ship Yard and the dedicated Maersk Broker organization.

Customer Value

Go4 develops and builds purpose built bunker barges using state-of-the-art bunker tanker technology. This modular approach uses internationally approved, industry standards. Go4 combines the highly skilled precision of CBI Engineering with the Shenfei shipyard quality and the Maersk Broker network to create a bunker capable of producing multiple IFOs to maximize profitability, reduce cost and simplify logistics. With a Go4 bunker, your clients will know they are getting the right product and the right quantity at the right time.
